**Navigator®**

The information printed here reflects product design, fabrication, and component parts at the date of printing. The manufacturer reserves the right, at any time, to make changes in product design or material or component specifications as its sole option, without notice. This includes the substitution of components of a different brand or trade name, which will result in comparable performance. All information printed in this document is subject to change after the date of printing. Due to product improvements, changes during the model year and/or transcription errors that may occur, information represented within the owner's manual and/or this document may not be accurate at the time of your purchase. Please confirm any information with your dealer.

The following information is an addition to the information in *Section 5 - Equipment* of the **2005 Navigator® Owner's Manual**. Please utilize the information provided henceforth.

The following information was an omission to Section 5; Equipment, of the 2005 Navigator® Owner's Manual. This information should be added to the existing manual.

## POWER SUPER SLIDE (Optional)

The power storage tray, located in full pass-through bays only, can be operated from the momentary switch (located in the curbside bay) or the Power Slide remote. Manual override is available if power is lost. Safety cut out switches on the roadside and curbside will prevent tray operation when the cargo bay doors are closed.

### Using the Switch:

- Open curbside bay door. The switch moves the tray both directions. Press and hold the switch to move the tray. When the switch is released the tray will stop.

*Power Slide Switch:  
Located in curbside  
storage bay.*

### Using the Power Slide Remote:

- Press the left or right arrows, adjacent to the tray number to be moved, to slide the tray out.
- To stow the tray, press the stow button (1 or 2).
- If the tray is out on the roadside and the curbside button (right arrow) is pressed, the tray will return to the stow position.
- While tray is sliding out, press the opposite arrow button to stop tray operation.

*Power Slide Remote*

### Troubleshooting:

- Ensure the House Battery Disconnect switch in the battery compartment is ON.
- Ensure interior house power is ON.
- Check the safety switch on the hinged side of the cargo door opening for proper operation. When the door is open, the switch should provide a ground through the metal contacts on the back of the switch.
- Power comes from a 40 Amp mini-breaker in the Rear Run Box labeled Bay Slide.

### NOTE:

**Maximum weight capacity is 800 lbs. Never exceed this amount.**

**Manual Override:**

If battery power is lost or if there is an electrical problem, the tray can be manually moved. Lift the manual release lever on the power module. Push tray in and return arm to lock position.
