

Addendum

Overhead Defrost

(Optional)

2006 Neptune®

The information printed here reflects product design, fabrication, and component parts at the date of printing. The manufacturer reserves the right, at any time, to make changes in product design or material or component specifications as its sole option, without notice. This includes the substitution of components of a different brand or trade name, which will result in comparable performance. All information printed in this document is subject to change after the date of printing. Due to product improvements, changes during the model year and/or transcription errors that may occur, information represented within the owner's manual and/or this document may not be accurate at the time of your purchase. Please confirm any information with your dealer.

The following information should be included in the **2006 Neptune** Owner's Manual.

OVERHEAD DEFROST (Optional)

The overhead defrost option includes four vents mounted in the overhead TV cabinet. A three-way rocker switch controls airflow to these vents. This switch is mounted on the dash to the right of the steering wheel. See illustration for settings.

Power Requirements:

- The ignition switch must be on for the overhead defrost blower to operate.
- A 15 Amp fuse for the overhead blower is located in the front electrical box. Fuse assignments are called out on the inside of the fuse panel cover.
